

Drafting - Architectural

The architectural drafting program trains students to develop detailed working drawings for use in the construction of residential and commercial buildings. The program centers on the basic techniques of drafting — linework, lettering, and problem solving — and freehand sketching and calculations for measurements, volumes, site preparation, energy needs, and cost analysis. Successful graduates may find employment with architectural and engineering firms, general contractors, material suppliers, structural fabricators, or modular and component manufacturers of residential buildings. (Enrollment into this program is limited and is based on the date of application.)

Before admission to the program, students will need to attain the following minimum entrance scores: COMPASS: Math Pre-Algebra Test 30, Reading 60, Writing 34; ASSET: Math Numerical Skills Test 37, Reading 35, Writing 38; ACT: Math 16, Reading 14, English 14.
