

# EMT Paramedic

The EMT training program will present field ready paramedics with the required knowledge and skills to care for patients who are injured due to trauma or suffer from medical problems. They will be eligible to take the National Registry for Advanced Life Support, and acquire a Nebraska license to practice as advanced providers.

This program is approved through the State of Nebraska Department of Health and Human Services Regulation and Licensure. EMT-Basic (EMTL 1830 or current EMT certification) is a prerequisite for acceptance into the NECC EMT-Paramedic program.

Many health care providers require a criminal background check prior to employment. Students will be required to submit to a criminal background check prior to completion of the EMT-Paramedic clinical courses. Individuals with a criminal record may not be eligible to complete clinical education in some settings based on the results of their criminal background check.
