Cisco Networking Academy Certificate

The Cisco Networking Academy certificate program consists of 16 credit hours of course work from our information technology offerings. Instruction includes concepts related to networking terminology and protocols, LANs and WANs, the OSI model layers, network cabling, routers, network topologies, IP addressing, switching, and network management practices. The certificate is designed to prepare students to successfully pass the Cisco Certified Network Associate (CCNA) exam. The exam may be taken at an official testing site upon completion of the required courses.

Required Program of Study for Certificate
