

DAIRY TECHNICIAN

Required Program of Study One-Year Diploma Program

The purpose of the dairy technician certificate program is to train students to work in the expanding dairy industry in Nebraska. The dairy technician certification diploma is a “stepping stone” for students interested in involvement in the dairy industry. Career opportunities exist on an increasing number of large dairy farms in Nebraska. Opportunities also exist for developing working partnerships with family dairy farm operations. In addition, this program enables graduates to return to their own dairy farms with a focus on grass-based systems. With the increasing amount of milk being produced, career opportunities also exist in the milk and cheese processing industries.
